

Offshore Europe Triumph!

Thank you to everyone who visited the IESTA stand at Offshore Europe last month.

It was an extremely busy and successful show with over 42,000 visitors over the course of the three day event. Many of you dropped by the stand in its prime position in the People Zone connecting with IESTA and Solutions.

Our lunch-time presentations were a hit as we explored the answers to many technological challenges faced in the Oil & Gas Industry today. **Onboard Solutions** went down brilliantly and we were able to demonstrate the power and capability of the software which tracks people, projects, assets, training and competency in one collaborative online portal.

If you or your colleagues would like to know more about **Onboard Solutions** or would be interested in a demonstration, please get in touch with [Cerri McDonald](#).
