SAVE MONEY & TURN YOUR SERVER ROOM GREEN

IT INFRASTRUCTURE = HIGH ENERGY USE

As a supplier of IT infrastructure we are acutely aware of the power that servers, switches, air conditioning units and other IT related equipment use.

So we've partnered with the UK's leading energy broker to help save our clients money and turn their energy footprint **GREEN**.

WORST
CASE

We will keep your
existing supplier
HONEST!

BEST
CASE

We will find you a better
deal and turn your server
room **GREEN**.

**No commitment to make and nothing to lose.

WHAT WE DO?

Typically we can save our customers between 10 - 20%, and in some cases up to 50%, of their current bill.

We help our customers get the best value from their energy contracts, reducing their energy consumption, minimising their carbon footprint and ensuring that their bills are correct.

Our **Energy Partner** not only provides procurement services, but all the other services you would expect from one of the UK's leading utilities and energy consultants.

HOW WE DO IT?

- Stressless end-to-end supply management
- Buying at the right time by constantly monitoring the market
- Knowing your business & lowering your usage
- Installing Smart Meters can help cut your energy bills

WHAT WE NEED FROM YOU?

Before we get started on our search for the best deal for your company, we'll need a few things from you.

We'll need your recent **gas and electricity bills** from your current supplier.

We'll also need **a signed letter of authority (LOA)** on your company's headed paper. We can send this to you as a PDF or word document for you to print and fill out before scanning and sending back to us.

Why do we need an LOA?

The letter of authority allows us to obtain important information from your existing supplier such as the contract end date along with relevant meter data showing how and when you use your energy and gas. Furthermore, it allows us to request bespoke pricing from suppliers on your behalf. Importantly, we won't do anything outwith the LOA without your express permission!

TURN YOUR SERVER ROOM **GREEN!**
